Our Brand

Inspired by the vision of our beloved Prime Minister Mr. Narendra Modi, Varmora Group added a separate vertical Varmora Sanitaryware and Bathware to its business domain in 2014. Inspired by the various national projects initiated by the PM, the group set up its own manufacturing plant in Morbi.

Within a span of 6 years, today Varmora Bathware takes pride in carving a niche for itself as an affordable brand by pooling together a wide range of products to meet the demands of luxury and comfort. It caters to the global demand of all the project segments such as residential, commercial, government and corporate.

Premier *Creations*

A cistern is a waterproof receptacle used for holding liquids, usually water. The modern water closet or toilet utilizes a cistern to reserve and hold the correct amount of water required to flush the toilet bowl.

Under its sanitaryware range, Varmora has developed a marvelous range of PVC Cisterns, which are sleek in design and excellent in performance. The PVC material makes the cisterns strong and durable, while also allowing it to easily match the aesthetics of the water closet.

Unseen *Excellence*

Almost similar to the regular and popularly used cisterns in bathrooms, the concealed cisterns only differentiate at one point and that is their visibility. Concealed cisterns are built into the wall behind the toilet.

Varmora has a collection of high capacity concealed cisterns, which can be used to seamlessly enhance the décor of your bathroom. Concealed cisterns are easy to use and do not take up extra space in bathrooms, which makes them ever so necessary for small bathrooms in particular.
